

AtomiCash™

AtomiCash is the ultimate innovation in Internet marketing as it leverages the entire traffic base of internet users. There is a HUGE, ABSOLUTE MONSTEROUS AND GROWING group of individuals on the Internet who are striving to add income from their blogging, organized business related (social) networking, etc. In a perfect world, as an iRep you could reach out and enroll the blogger in TamPogo and in turn the blogger would attach TamPogo links and a proportion of the readers would join. Unfortunately, the world isn't perfect. That just isn't going to happen. But here is what can happen.

Currently, almost 100% of a bloggers on-line income comes from the pennies supplied per click by Google as part of their Ad Sense program. The pennies add up, but not fast enough. AtomiCash provides "simple shopping apps" and short "daily informational apps" that bloggers can use to easily attach to their sites facilitating the direct buying of a variety of products and services or opt in to daily informational feeds that can trigger future buys.

Once a person becomes a customer or opt-in user of AtomiCash, the individual "belongs" to the blogger (or Facebook user, etc.) for life and earns a full 20% payment based on the retail pricing for all activity by that person. For setting up the blog site, the TamPogo iRep earns a full 20% forever on all activity and the iRep's upline earns an additional 10% of the retail for that person, forever.

AtomiCash also opens up a preselected keyword search box which allows shoppers or readers access to related products and services via click. As a major venture partner of a leading search engine, AtomiCash receives up to 60% of the actual search charges which can range from \$1.00 to \$3.00 per click for nutrition searches up to over \$20-\$35 dollars per insurance click, etc. As indicated above, 20% of the total search income received is dispersed to the blog site, 20% to the iRep and 10% to the upline. The monetary windfall from search monies is limitless.

The AtomiCash app will also migrate to cell phones allowing access to the local search market for goods and services and will allow all AtomiCash users to be registered for discounts in their local and national markets. The merchant provider will also pay a marketing or facility fee to AtomiCash for their customer activity allowing the cash disbursements listed above to be made.

Imagine the cash flow due an iRep who is able to set up a popular celebrity site, for example, that would have millions of followers who could benefit from AtomiCash. A singer, through their blog, Internet site, Facebook page or Tweets could earn money from their visitors eating a hamburger at a national chain, when buying a book on line, when getting an insurance policy, from searching goods and services on the Internet, eventually, by doing virtually everything.

If you are interested in spreading the AtomiCash message and benefiting from this incredible new marketing wave, you simply sign up on the form that will be available beginning on our anniversary July 4th. Participation is, of course, FREE.
